Alain Pascal Francés

Hydrogeologist, PhD · Assistant Researcher, LNEG (Lisbon, Portugal)

alain.frances@lneg.pt 0000-0002-1823-3094 ResearchGate LinkedIn GitHub

Profile

Hydrogeologist at LNEG, Portugal's National Laboratory of Energy and Geology, with more than 25 years of experience in Hydrogeology and Geoscientific Information Management. Combines numerical groundwater modelling (MODFLOW 6, FloPy, PEST) and coupled unsaturated–saturated zone modelling (MARMITES, of which he is the developer) with hydrogeophysics (ERT, TDEM/FDEM, MRS), remote sensing and GIS.

Currently involved in:

- The EU project DRYAD (https://dryad-project.eu/), from which he is the leader of Work Package 3 (modelling of Mediterranean agro-silvo-pastoral ecosystems)
- The update of the Hydrogeological Map of Mozambique (DNGRH/World Bank) Capacity building through PanAfGeo (https://panafgeo.eurogeosurveys.org/)

Position and key projects

since 2021 — **Assistant Researcher** | LNEG, Geology, Hydrogeology and Coastal Geology Unit
Hydrogeology and Geoscientific Information Management. At LNEG and its predecessor institutes (IGM, INETI) since 1999.

2024–present — **DRYAD – Leader of Work Package 3** | EU project
Nature-based solutions for the resilience of Mediterranean agro-silvo-pastoral ecosystems WP3: modelling of Mediterranean agro-silvo-pastoral ecosystems) dryad-project.eu

2024–present — **Updating and Upgrading the Hydrogeological Map of Mozambique** | World Bank, DNGRH
Contract DNGRH-346682-CS-QCBS with the National Directorate of Water Resources Management.

2024–present — **PanAfGeo** | EuroGeoSurveys
Trainer in geoinformation (GIS, databases) and hydrogeology for African geological surveys.

2015–2022 — **PLANAGEO – National Geology Plan of Angola** | Head of digital mapping and hydrogeology
Coordination of 18 geological sheets at 1:250 000 and 7 at 1:100 000; hydrogeological map at 1:1 000 000; hydrogeology of the Kalahari–Ohangwena (Cunene) aquifer system with TDEM and drilling.

2016–2019 — **Groundwater surveillance of the Neves-Corvo mine** | PVCA-NC
Groundwater flow model and reporting.

Education

2015 — **PhD in Hydrogeology** | University of Twente, ITC (the Netherlands)
Integration of hydrogeophysics and remote sensing with coupled hydrological models. FCT doctoral grant.

2008 — **MSc in Water Resources and Environmental Management** | ITC (the Netherlands)
Groundwater Assessment and Management; graduated with distinction (90/100).

1995 — **Maîtrise des Sciences de la Terre (Geology)** | Université Paul Sabatier, Toulouse
Final year at the University of Lisbon (Erasmus).

Expertise

Modelling	MODFLOW 6, MODFLOW-NWT (UZF, SFR, LAK), FloPy, PEST; MARMITES–MODFLOW; recharge and evapotranspiration partitioning; conceptual models; pumping tests
Geophysics	Geoelectrical (Syscal Pro, ABEM SAS4000, SuperSting R8); TDEM (TEM-FAST 48); FDEM (EM38/31/34); magnetic resonance sounding (NUMIS Lite)
Data & GIS	ArcGIS Pro, QGIS, SAGA GIS; PostgreSQL; Python, R; satellite image analysis; automatic monitoring networks

Supervision, peer review and service

Supervision	2 MSc theses ongoing (Universidade Eduardo Mondlane, Mozambique, co-supervision); 4 MSc theses at ITC (2009–2010); 2 undergraduate projects (2001–2002)
Reviewer	Hydrogeology Journal, Journal of Hydrology, Journal of Hydrology: Regional Studies, Journal of Applied Geophysics,

	Near Surface Geophysics, Geophysical Prospecting, Environmental Earth Sciences, Frontiers in Water, Pure and Applied Geophysics, and others
Membership	International Association of Hydrogeologists (IAH), since 2000
Languages	French (native), Portuguese (fluent), English (fluent), Spanish (spoken, reading)
